Euring D, Ayegbeni S, Jansen M, Tu J, Gomes da Silva C, Polle A (2016).

Growth performance and nitrogen use efficiency of two *Populus* hybrid clones (*P. nigra* × *P. maximowiczii* and *P. trichocarpa* × *P. maximowiczii*) in relation to soil depth in a young plantation.

iForest – Biogeosciences and Forestry – doi: 10.3832/ifor2016-009

## **Supplementary Material**

Fig. S1 – The block design of Max1 (blue color) and H275 (white color) plantation. Each cell represents one plant. The left box with red edge corresponds to deep soil region, the right box with red edge corresponds to shallow soil region.
